

A calm dispatch workspace

Current visual rules taken from the React app and client/src/styles.css.

DW

District Wheels

Dispatch directory

Fast to find. Easy to copy. Clear when something fails.

The interface gives records room to breathe, uses yellow for attention and focus, and keeps contact and destination values close to their Copy actions.

Core interaction

Search updates as the manager types.
Buyer records open from a full row.
Copy feedback appears in words.
Location editing stays in the form.

Current architecture

React pages and shared components.
Supabase sign-in and buyer data.
Express API also exists in the repo.
No UI component library.

The four current routes

/ Buyer Directory /buyers/new Add Buyer
/buyers/:buyerId Buyer Details /buyers/:buyerId/edit Edit Buyer

Document status

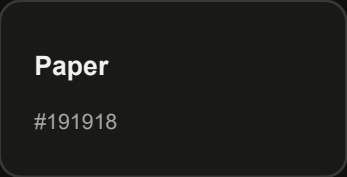

This guide describes the implemented UI. The app remains in verification: connected workflows, privacy rules, and responsive behavior still need final testing.

Color with a job

Light and dark themes share one yellow brand anchor.

 Yellow / attention #FFD200	 Ink / text #11110F
 Paper / panels #FFFEF9	 Surface / page #F5F4EF
 Rule / border #D9D7CF	 Danger / actions #B42318

Dark theme

 Paper #191918	Text #F3F2ED Muted #AAA9A2 / rule #383835	 Copy all
---	---	---

Usage

Primary buttons use ink with light text; the prominent Copy all action uses yellow.

Yellow carries dark text. Errors use a message plus a danger color.

Theme preference is saved and can be changed from the header.

Inter, space, and structure

The current app uses Inter and responsive spacing rather than the old system-font scale.

Typography

Buyer dispatch records

Page heading / responsive 2.35-4.2rem / weight 600

Shipping details

Section heading / 1rem, compact and clear

Layout rules

Desktop

Maximum content width: 1160px.
Page top spacing: 64px.
Form fields use two columns.
Details use one main panel.

Compact screens

At 820px: one-column form fields.
At 500px: stacked actions and cards.
Page side padding: 20px.
Minimum viewport width: 320px.

Shape and touch

Controls and buttons have a 44px minimum height. Panels have a 14px radius; buttons and inputs generally use 10px. Spacing varies by task area rather than following a strict 8px-only scale.

Reading order

Directory: heading -> search -> buyer rows. Details: buyer -> shipping method -> location -> copy fields. Form: buyer information -> delivery choice -> locations.

Components in use

Document the controls that are present in the current code.

Buyer Directory

AppBar: logo, sign out, theme toggle.

Search field: updates as you type.

BuyerCard: name, phone, courier, open.

Loading, no results, and retry states.

Buyer Details

Method toggle for eligible LBC records.

Saved-location select when needed.

CopyField beside each displayed value.

Copy all shipping details + feedback.

Add and Edit Buyer

Inline LocationEditor fieldsets.

Address and pickup forms as needed.

Default selection and remove actions.

Validation messages near fields.

Sign-in gate

Auth card before private routes.

Labeled inputs and provider action.

Status messages and sign-out control.

Uses the same surfaces and controls.

Button treatments

Primary

Copy all

Secondary

Delete

Accessible feedback

Visible focus rings use yellow; copy and save results use text. Inputs have visible labels, and invalid fields show text errors. Reduced-motion preference is respected.
