Buyer Details component tree

Repeated components are named once; levels only depend on the levels below them.

ATOMIC LEVELS

Atoms	Button, Input, Label, Tag, CopyFeedback
Molecules	CopyField, FormField, MethodControl, LocationSelector
Organisms	Header, BuyerSummary, ContactDetails, ShippingDetails
Template	DispatchRecordLayout
Page	BuyerDetailsPage

STATE OWNERSHIP

- BuyerDetailsPage: buyer, addresses, pickups, loading, errors
- ShippingDetails: selected method and saved location
- CopyField: short-lived copied or failed feedback
- Data flows down; callbacks carry changes up

Primary task walkthrough

Find a repeat buyer and transfer the correct shipping details.
